**HELLO AND WELCOME TO XCAPE PROJECT!**

The XCAPE project proposes the creation of a comprehensive suite of **fully online digital breakout challenges** to attract those on the margins of education and training, and to support them to build the key components of creative and critical thinking, through a challenge-based learning approach.

The project has **three main intellectual outputs:**

- IO1: Digital Breakout Compendium of Resources
- IO2: In-service Training Programme and Handbook
- IO3: Online Learning Portal

## The Heart of the project

### IO1: Digital Breakout Compendium of Resources:

We developed several breakouts in different areas: critical and creative thinking, entrepreneurial spirit, digital competence, and media literacy. The resources are available free of charge on the platform, in all partner languages: Bulgarian, Finnish, Greek, Icelandic and Portuguese. The Digital Breakout was developed with the greatest care to have an immersive experience.

### IO2: In-service Training Program and Handbook:

Was developed considering the needs of VET tutors and prepares them to use the XCAPE resources and create their own resources and digital breakouts.

The in-service training programme is available online as a handbook in pdf format for printing and as a flip-book for online use.

**IO3: Online Learning Portal:** provide instant access to all the XCAPE resources, user friendly, interactive, and intuitive. The online Learning Portal is available free of charge, and you can access any time and any place.

The **XCAPE project** has come to an end (sound of crying) ...

Throughout the project all partners collaborated to reach a goal.

Due to the consequences of the pandemic, partners always discussed how they can work to promote an engaging environment and with good collaboration.
